Conclusions

The Kussala Institute for Strategic Leadership and Peacebuilding (KISLP) was founded on the conviction that peace is not merely the absence of war, but the presence of justice and ethical governance. In the face of the unique challenges currently facing South Sudan, the DRC, and East Africa, the need for a home-grown, research-driven leadership institute has never been more critical. We recognize that the road to sustainable peace is a collective journey. We cannot achieve this vision in isolation.
